

FAASTeam presents:

# **PREPARING FOR YOUR FIRST FLIGHT - - with Dave Prizio**

Our March EAA Chapter 92 program will be of interest to anyone who has dreamed of building an E-AB (experimental, amateur-built) aircraft. In this presentation we will look at considerations for a safe and successful first flight in an experimental amateur-built aircraft, based on my personal experience and guidance available from the FAA in advisory circulars AC90-89B-Amateur-Built Aircraft and Ultralight Flight Testing Handbook and AC 90-116-Additional Pilot Program for Phase I Flight Testing. The main points covered will be preparation of the required paperwork, preparation of the airplane and preparation of the pilot. The goal, in every case, is to make the first flight experience more enjoyable and more successful, and, above all, as safe as possible for the pilot/builder.

**Directions:** South on the 55 Freeway to the freeway end in Costa Mesa; right on 19th Avenue, left on Park Avenue. Community Center building is on the right, just beyond the Costa Mesa Library.

#### **A message from the National FAASTeam Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.

## **Event Details**

**Tue, Mar 1, 2016 - 18:30 PST**  
**Costa Mesa Community Center**  
1845 Park Avenue  
Costa Mesa Community Center  
Costa Mesa, CA 92627
